RE: Enforcement Order: SEAA 1272

Dear Keith,

As we were reviewing our compliance progress for meters on the Lower Fremont system, the meter for your diversion on the Garkane canal is still not operational. As you may recall a new battery was ordered and replaced, but the meter still did not function, and a new meter may be required. We still require metering for all diversions on as one of the requirements for using water rights under Utah State Statute. We would like to have an operational meter installed to monitor your diversion. The type of meter is used is up to you.

The measurement requirement is one of the basic tenets of state water law and the responsibility is for the water users to provide a functional and accurate measuring device. This is a formal request under State Engineer's Agency Action 1272 (SEAA 1272) and must be done prior to system startup in the spring of 2017. During the winter, with systems shut down, is a perfect time to have a meter installed.

Water will not be provided into your diversion until a functioning meter has installed, (next 60 days), the existing enforcement order is back in place until a functioning measurement device is installed.

If you have any questions or comments please contact me at 801 538-7430 or by email at MikeSilva@utah.gov I also recommend that you contact Randy Bradbury, Lower Fremont Water Commissioner at the number provided below.

Sincerely,

Mike Silva
Distribution Engineer
